

BIG QUALITY STORY.

(told in little parts)

Here's a "must read" for anyone responsible for procuring high-precision, injection molded components: The Quality Systems Manual from Inland Technologies. Free to qualified prospects, it's a real-life story of how we achieve the industry's highest standards of quality—covering everything from procedures and policies to controls and methodologies. There's even a chapter about our ISO-9001 certification.

Inland Technologies is an FDA-registered facility that was built from the ground up to be fully ISO-9001 compliant. Our quality standards have always been impeccable. Since the day we opened our doors. All our injection molding and assembly operations are performed in an environmentally controlled, class 100,000 clean room. Real-time process monitoring and QSR procedures also help guarantee superior product quality. First time. Every time.

Want your next plastics project to have a happy ending? Call Inland Technologies today. We'll give you our whole ISO-9001 quality story—chapter and verse.
